

Ornamental

Ornamental has, during the last 10 years, become the UK's Number 1 selling bark mulch.

It is economical in terms of the cost savings it offers against the labour and chemicals required to maintain large areas of tree and shrub plantings from weed growth.

Ornamental acts as an active weed suppressant allowing plants to establish on newly planted sites.

The current concern related to the use of chemicals has only helped to strengthen the case for bark – added to which helps to retain moisture during dry spells and combines to give a pleasing finish to all landscaping projects.

While the bark will break down after several years, it will continue to improve soil characteristics.

Bark Products produces Ornamental from different sites using locally sourced materials, therefore, there will be a variance in appearance and make up.

If in doubt, please request a sample prior to placing orders.

SIZE RANGE 0 – 50mm
PH 6 – 7.5
BULK DENSITY 0.30 – 0.40 g/L

Decorative

Top quality chipped bark utilising the best raw materials available. The product is highly decorative in appearance and can be used for all mulching operations where aesthetics is of primary importance.

The product is long lasting if maintained properly and laid to a minimum of 50mm depth.

SIZE RANGE 20 – 60mm
PH 4.5 – 5.5
BULK DENSITY LESS THAN 3g / litre
WOOD CONTENT LESS THAN 5%

Nursery

Top quality chipped bark utilising the best raw materials available. The product is highly decorative in appearance and can be used for all mulching operations where aesthetics is of primary importance.

The product is long lasting if maintained properly and laid to a minimum of 50mm depth.

SIZE RANGE 5 – 10 mm
PH 4.5 – 5.5
BULK DENSITY LESS THAN 3g / litre
WOOD CONTENT LESS THAN 5%

Composted

A pulverised and composted bark created from mixed conifer species. Suitable for mulching where it is an ideal dark rich mulch for borders and rose beds. Used to create a pleasing contrast between green foliage and flowers whilst at the same time giving economy through its weed suppression characteristics. The product also helps to protect against adverse weather conditions in that it allows the soil to retain moisture during dry times, but keeps soil temperature up during cold spells.

Also, ideal a soil conditioner on heavy soils where its larger particle size opens up the soil.

SIZE RANGE 0 – 20mm
PH 6 – 7.5
BULK DENSITY 0.4 – 0.45 g/L

Due to the pH levels, Composted bark is not recommended for use on soil areas containing Ericaceous plants.
